1. Abstract:

Student counseling & finance management system software where admin (student) can login and view dues update and also print it and also check other fees, fee related notice and download course registration form, grade sheet, money receipt, admit card from his account, and accountant can add/view/edit/delete student, check and regular update due fee and logout.

2. Area/Field of project:

Online computer software for windows(OS).

3. Existing Works:

Yes, it exists as the name of fee report software. Where student can add and delete and also update his account. But in University finance management system software where student can only view and give require information in his account and also download information. Where accountant can add or delete or update information. Student also check grade sheet and as well as other due report.

4. Proposed Possible Algorithm/Method/Tools:

a. Java swing (Netbeans IDE).

b. SQL (Xampp Control).

5. Expected Result/ Outcome/ Conclusion:

Sometime student face problems to find out his semester dues and withheld report. In exam days, student face so many difficulties to take admit card and which is time consuming and as well as hamper last minute exam preparation. So, University finance management system software helps student to easily find out dues and also solve taking admit card problem and other information find out problem.
